RE: Buildings 528, 559, and 561 notification of intent to invoke the Facility Component Removal, Size Reduction, and Decontamination Activities RSOP (Component RSOP)

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has received your May 8, 2002 letter, and revised checklists, notifying us of your intent to utilize the Component RSOP for component removal and decontamination activities that are to occur in Buildings 528, 559, and 561. We hereby agree that the appropriate activities may proceed utilizing the Component RSOP.

As indicated in your letter the consultative process will be utilized to provide the appropriate information and to keep us informed of the decommissioning strategy prior to performing the decommissioning activities.

It is also stated in your letter that the facility will not be breached by the proposed decommissioning activities. However, in the Component Removal checklist for each building, walls, floors, ceilings and roofs were checked in the May 8th version of the checklists. Removal of the exterior walls, floors and roofs would have breached the buildings. As such, to provide needed clarification, revised/replacement checklists were provided to the Division. These revised checklists indicate that only interior walls and ceilings may be removed, and removal of exterior walls, floors, and roofs that would likely breach the building shell will not be performed as a part of this Component RSOP Notification.

If you have any questions regarding this correspondence please contact me at (303) 692-3367, Denise Onyskiw at (303) 692-3371 or (303) 966-6687, or David Kruchek at (303) 692-3328.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator
